THE OPPORTUNITY

Restaurants deserve better than chaos

Owners told us the same story everywhere: menus stuck in PDFs, stock tracked in notebooks, tasks scattered across WhatsApp, money buried in Excel. Nothing talks to anything else — and enterprise software feels cold, expensive, and overbuilt for a dhaba or a growing chain.

The pain today

- Reprinted menus every time a price changes
- Last-minute market runs because stock wasn't tracked
- Opening checklists lost in group chats
- Table orders scribbled on paper, re-entered later
- Finance split across outlets with no single view
- Staff given full access — or locked out entirely

The RestoHub answer

- One hub for every outlet you operate
- Live QR menus guests scan — no app download
- Ingredient stock with low-level alerts
- Prep, opening & closing checklists with accountability
- Visual table board with in-house menu orders
- Role-based team access — invite only, no random signups

HOW IT WORKS

1

Create your org

Sign up free. Add outlets with currency & timezone.

2

Build & invite

Set menus, tables, stock. Invite staff by role.

3

Run service

QR menus live. Tables seated. Checklists done.

4

See the picture

Finance, alerts, and compliance in one dashboard.

PLATFORM

Everything in one place

From walk-in to walk-out — tools designed around how restaurants actually work, not how software vendors imagine they do.

Multi-outlet management

Mumbai, Kolkata, Dubai — one organization, many locations. Each outlet has its own currency, menus, stock, and tables. Switch instantly from the dashboard.

QR digital menus

Beautiful mobile menus per outlet. Guests scan, browse, see live prices in local currency. Update once — every table tent reflects it instantly.

Inventory & stock alerts

Track ingredients per outlet with reorder levels. Low-stock notifications land before Friday night rush turns into a market run.

Prep & maintenance checklists

Opening, closing, prep, and equipment SOPs with ordered steps. Assign runs, track compliance, get overdue alerts.

Checklist runs

Turn templates into live runs. Tick steps on phone during service. Know exactly who completed what and when.

Table allocation & orders

Visual floor board. Seat guests, take orders from your live menu, add items mid-meal. Totals in outlet currency.

Finance & ledger

Income and expense tracking per outlet, per month — in INR, USD, or any outlet currency. Profit at a glance without accounting complexity.

Team & invite-only access

No random signups to your data. Invite by email, assign role and outlets. Revoke access anytime. Plan limits scale with your crew.

Notifications hub

Low stock, overdue checklists, maintenance due — one inbox so managers react before guests notice. Less WhatsApp chaos.

SECURITY & ROLES

Everyone sees exactly what they need

Role	Access	Typical user
Owner	Full access. Delete org. Auto-assigned to org creator — not invitable.	Restaurant founder / group head
Admin	Manage outlets, team, plan upgrades, all operations across locations.	Operations head, co-owner
Manager	Edit menus, stock, finance, tables, checklists. View team.	Outlet manager, head chef
Staff	Run checklists, seat guests, take table orders. No finance access.	Floor staff, servers, prep crew

PRICING

Start free. Grow when you're ready.

Transparent plans that match how restaurant groups actually scale — from a single dhaba to a multi-city chain.

	MOST POPULAR	
Free \$0 /mo Perfect to try RestoHub with one location	Pro \$9 /mo For growing restaurants with multiple branches	Business \$29 /mo Unlimited scale for restaurant groups
✓ 1 outlet ✓ 3 team members ✓ 20 menu items ✓ 5 checklists ✓ QR menu included	✓ 5 outlets ✓ 25 team members ✓ Unlimited menu items ✓ Unlimited checklists ✓ Full QR menus	✓ Unlimited outlets ✓ Unlimited staff ✓ Full inventory & finance ✓ Audit logs ✓ Priority support

WHY RESTOHUB

Built for real kitchens Designed around Friday night rushes, monsoon shortages, and the owner who is also the cashier — not demo-perfect scenarios.	Clarity over complexity Every screen uses plain language — Stock, Prep, Tables — the same words your team already uses. No consultant required.
Trust through transparency Role-based permissions protect finance data. Guest menus are public by design — nothing else is.	Local first, global ready INR formatting, Indian phone support, and multi-outlet groups whether you run a dhaba in West Bengal or a chain across countries.
